

ALEX MORGAN

Staff Distributed Systems & Infrastructure Engineer

Email: alex.morgan.systems@gmail.com | GitHub: github.com/alexmorgan

EXECUTIVE SUMMARY

Staff-level engineer with 8+ years architecting fault-tolerant distributed platforms, high-throughput streaming systems, and low-latency storage runtimes in Rust and Go.

PROFESSIONAL EXPERIENCE

Staff Infrastructure Engineer - Veloce Systems (2022 - Present)

- Architected distributed control plane managing 450k+ concurrent workloads.
- Redesigned cluster gossip consensus, lowering p99 response times by 38%.

Senior Backend Engineer - Aether Cloud (2019 - 2022)

- Owned high-volume streaming ingest pipeline processing 1.2 billion events daily.
- Migrated microservices to Rust, slashing fleet compute costs by \$420k annually.

CORE COMPETENCIES & TECHNOLOGIES

Languages: Rust, Go, TypeScript, C/C++, Python, SQL

Systems: Distributed Consensus (Raft/Paxos), Vectorized Query Engines, eBPF

Platforms: Kubernetes, Docker, Apache Kafka, PostgreSQL, ClickHouse, AWS

EDUCATION & CREDENTIALS

M.S. in Computer Science (Distributed Systems) - Carnegie Mellon University (3.94 GPA)

B.S. in Computer Engineering - University of Michigan (Summa Cum Laude)

Certified Kubernetes Administrator (CKA) - Linux Foundation / CNCF
